

Preeminent Postdoctoral Program Benefits Emerging UCF Scholars

UCF Preeminent Postdoctoral Program, known as P3, targets outstanding scholars who are beginning their postdoctoral training at UCF. The program provides matching support for salary and benefits for two years and an additional travel allowance each scholar to advance their professional training.

The college began accepting applications for the P3 program in 2016 and has since awarded support to principal investigators to hire hundreds of new postdoctoral scholars across UCF. In fiscal year 2023, UCF employed 232 postdocs, and 158 were funded by P3.
